

PDA540P provides 4 channels with output power of 4x500W @4 Ohm. Moreover the low and mid channels can be bridged into a powerful configuration allowing 1kW@4/8ohm +2x500W@4ohm in order to drive i.e. Subwoofers and satellites. In addition it offers a full set of added value features such as on board DSP and RS485 connection for monitoring and control via dedicated PC software. The 4 output stages use the well-known Pascal Class D SPRO2 and SA-2 module. The **PDA540P** includes a set of sophisticated processes for loudspeaker, implemented by the powerful M704 DSP running 48kHz/24bit [96 bits precision for the internal intermediate

processes] and high performance 24bit AD/DA Converters. Processes as Noise Gate, crossover filters, parametric EQs per input and output sections, RMS compressor, Peak Limiter, alignment delay, all in all everything needed to optimize a self-powered loudspeaker. Moreover the efficient heat dissipation system and Over-Heat protection ensure uncompromised reliability. Furthermore the **PDA540P** is also equipped with a useful Pink/White noise generator. All setup parameters for input mixing, DSP features and the limiter setting are accessible by using the remote PC software.
